SUMMARY

Motivated and detail-oriented B.Tech Computer Science student with expertise in full-stack development, problem-solving, and automation. Passionate about building scalable applications and optimizing workflows. Seeking a challenging role to leverage my expertise in the MERN stack, data structures, and analytical thinking to contribute effectively.

Projects

HireTrack : Job Tracker Website

GitHub

- Developed a full-stack platform to track and manage job applications with role-based access (admin and applicants) which supports concurrent usage by multiple applicants, designed with a scalable architecture.
- Integrated real-time chat using Socket.io and automated job submissions via Selenium, cutting manual application time.
- Secured workflows with JWT authentication and built robust backend on Express & MongoDB.

AptiAce : Aptitude Practice Website

GitHub

- Implemented a quiz-based web platform for chapter-wise aptitude practice with distinct admin and user roles.
- Designed a structured question categorization system to enable targeted learning.
- Developed a secure, database-driven backend to manage MCQ tests and efficiently track user results.
